WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2004/004418

Box No. 1 Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
☐ This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material
☐ a sequence listing
☐ table(s) related to the sequence listing
 - b. format of material
☐ in written format
☐ in computer readable form
 - c. time of filing/furnishing
☐ contained in the international application as filed.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/JP2004/004418

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-13</u>	YES
	Claims _____	NO
Inventive step (IS)	Claims <u>1-10</u>	YES
	Claims <u>11, 12, 13</u>	NO
Industrial applicability (IA)	Claims <u>1-13</u>	YES
	Claims _____	NO

2. Citations and explanations:

Document 1: JP, 49-89986, A (Siemens AG), 28 August, 1974 (28.08.74)

Document 2: JP, 6-254720, A (Sugawara Kogyo K.K.), 13 September, 1994 (13.09.94)

The subject matters of claims 1-10 are neither described in any of the documents cited in the ISR nor obvious to a person skilled in the art.

The subject matters of claims 11 and 12 do not appear to involve an inventive step in view of document 1 cited in the ISR. Document 1 describes a cutting tool having exchangeable blades on right and left sides. A rake angle of 20 degrees formed between a relief face and its adjacent face is not considered to provide any special working effect, and the said rake angle is a mere matter of design variation that a person skilled in the art could have decided as required.

The subject matter of claim 13 does not appear to involve an inventive step in view of document 2. Document 2 describes a throw-away tip type R cutting tool. In the technical field of throw-away tip type cutting tools, fastening the said tip using clamp bolts is a well-known technique without the necessity of exemplification.
